Our business is to develop, build, promote, and sell cable. However our passion is to foster, design, and share technology advances. The success of Quabbin relies on the successes of our customers. We are here to help you through each step of the cable selection process and remain present to assist you far beyond that purchase. We look forward to building a working relationship and cabling the way to the future with you.

Applications & Markets
- Datacenters
- Local Area Network (LAN)
- Data rates 10 Gigabits/second
- Industrial Local Area Network (LAN)
- Process Control Interconnections
- Continuous Flex/Rugged Industrial Ethernet
- Sensors and Instrumentation
- Digital A/V & Lighting Control
- Stage Lighting Control
- Telecommunication Systems
- Computer Peripherals
- Custom Applications

Networks and Connections that Go Beyond Our Cables
It is our practice to go above and beyond. Over the past 40 years we have been instrumental in helping to shape the future of communication cable. Not only are we members of respected groups and associations of the wire and cable world, but we have had the privilege to participate in standards committees and task groups where we can actively engage in the development of forthcoming cable specifications and products.

Easy Ordering & Shipping
- Sales representatives located throughout North America
- Live inside sales specialists available from 8-7 EST to answer questions and take your orders
- Orders for in-stock items qualify for same day shipping (Orders must be placed by 2pm EST for same day shipping)

Superior performance in data transmission
Industrial • Commercial • General Purpose • A/V & Lighting
**Superior Performance** — Expect it from our cable and from our company.

At Quabbin, the focus is on being the best we can be and manufacturing the best products on the market — not just compliant, better than compliant. That’s who we are; the desire to produce world beating products is our foundation. After that it comes down to holding tighter tolerances in the manufacturing facility and we do it consistently.

We do this by having two dedicated plants, one designed to run Ethernet only, while the other is designated for General Purpose cable. This allows our operators to maximize efficiency and perfect every cable that is being made.

Designing and producing the cable is only half of the equation. Every employee from Engineering to Shipping works in unison to deliver the best cable for your application needs. We don’t stop there — need assistance finding a connector or getting UL certification information? Quabbin’s Inside Sales Representatives are a phone call away and can help you find the answers to your questions.

**COMPANY BACKGROUND**

Quabbin Wire and Cable Co. was born in an old textile mill in 1975 when founder and current CEO Paul Engle discovered the need for a devoted manufacturer to produce a cable to meet the demands of the marketplace. While Quabbin’s beginnings may have been humble — consisting of two people in a 600 square foot office, a tiny loading dock and two operators running one lone machine it would be the start of a company that would see tremendous growth, provide hundreds of jobs to the community and transform a vacant textile mill from the days of yesteryear into a corporation that was churning out cutting edge data communications cable and once again relevant.

With goals set high Quabbin enjoyed significant success in its early years quickly outgrowing their confined quarters. By 1983 Quabbin would begin the very ambitious process of a $1 million expansion project which would include renovations to the old mill, purchase of new equipment, and the addition of more than 50 employees — many of whom are still with Quabbin today.

While many things have changed over the years, two things have remained constant — the company’s focus on innovation and dedication to provide top notch customer service. Today, Quabbin continues to grow and thrive in the communication cable industry as a worldwide leader in developing and manufacturing thermoplastic shielded and unshielded cables for high speed data transmission and various electronic applications. That once small 600 square feet of office space is now a 140,000 square foot facility where all design, manufacturing and corporate activity take place. While the heart of Quabbin remains in Ware, MA the continuing expansion has traveled well beyond state lines seeing the addition of five strategically placed North American locations as well as global sales and service support provided by both inside and outside sales representatives.

The future of Quabbin Wire and Cable looks even brighter than its past. With an increased demand for data communication speeds to support the constantly changing and growing technology along with Quabbin’s expertise and experience Quabbin is positioned to remain an industry leader for years to come.

“We don’t take our achievements for granted. Quabbin Wire is dedicated to meeting our customers’ expectations for excellent service, competitive pricing, and on time deliveries. We will continue to focus on bringing unparalleled value to our customers.” Paul Engle, President & CEO

**Cable for Harsh Environment**

- **DataMax® Extreme**
- **DataMax® Extreme Industrial Ethernet**
- **Ethernet, PoE, Power over Ethernet, Type A, B, C, E, Cat-Light**
- **PC/104, CEN/CEN Outdoor, Oil Resistant, UV Resistant**
- **Superior Flex Life**
- **High Flex Life**
- **Crush Resistance**

**Cable for Commercial Use**

- **DataMax® Patch**
- **DataMax® Patch Cable**
- **Meets or exceeds all electrical performance of TIA-568-C.2**
- **Provides quick termination & high yield**
- **Stocked in a variety of constructions and colors**
- **Trusted by OEMs and Resellers**

**General Purpose Wire & Cable**

What makes our wide selection of multi- conductivity products and services unique is our extensive selection of IN STOCK items you have to choose from. With a quick turnaround time, General Purpose wire products are able to maintain that stock to provide you with easy access and quick delivery.

- **RJ45 Equivalents**
- **RJ11 Equivalents**
- **RJ45 Stacked Part Numbers**
- **RJ45 Dedicated Manufacturing Pallet**

**Digital A/V & Lighting Control Cable**

Recognized for producing superior analog A/V and digital signal cables since 1993, Quabbin has now re-emerged as the premier manufacturer of copper-based A/V and Digital cables. Whether transmitting digital signals to drive sound and video or delivering transmitted data, lighting, Quabbin has a solution that’s both high performance and high life expectancy.

- **Linear® — Optima**
- **Digital Signal — HaZard**
- **Crash Resistance — High Flex Life Design**
- **Shore hardness 22 AGS**
- **100% Copper Conductor**
- **RoHS Compliant**
- **Blow Molded “Roadie Proof” Design**

**1993 Established**
**1996** Digital ISO 9001 Certification
**1996** Digital ISO 9001 Certification
**2001** First Industrial Ethernet Cable made
**2003** Became an ISO 9001:2000 Registered Inner
tube cable manufacturer
**2004** First Industrial Ethernet Cable made
**2005** 200+ Stocked Part Numbers
**2006** First Industrial Ethernet Cable made
**2008** RoHS Compliant
**2013** Received patent for special fibre shield
**2017** Recognized as 1% for the Planet Business
**2018** More than 35 years of history and innovation
