DataMax® Patch Cable
Security for mission critical communications

Cable specification is critical to the success of your project.
Patch cords are only as good as the cable, and studies show that a majority of patch
cords are marginal or failing at high data rates.*

Make Quabbin your worry-free choice. We are a qualified HUBZone small business
concern and a Veteran Owned Small Business. We proudly manufacture the most
secure, thoroughly tested, USA-made ethernet cables that meet or exceed standards
at all data rates — and maintain their performance over time.

Choose from more than 70 catalogued stranded patch cables available from our
network of nationwide warehouses.

For maximum security when you can’t take any chances — choose DataMax®.

Product Advantages
» Fully shielded cable available in all categories for higher data integrity and security
» Ruggedized options
» Low carbon footprint options
» Engineered to last and maintain performance
» Manufactured with tinned copper for durability
» Secure, thoroughly tested, consistent, and reliable for mission-critical applications

Quabbin Advantages
» Best in class in stranded conductor ethernet cables
» Engineering expertise readily available
» Accessible, responsive management
» More than 70 catalogued patch cables
» Live inventory on our website
» Network of nationwide warehouses
» Ease of doing business — we are customer focused
» Veteran Owned Small Business
» 100% American made

*See our testing of 56 different patch cords at www.quabbin.com/patch-testing

DataMax® Performance and Security

This graph demonstrates the considerable headroom between the category return loss limit (red) and DataMax® cable test results. DataMax® is thoroughly engineered, tested, consistent, and reliable for YOUR mission-critical applications.

Fully shielded cable is available in all categories for higher data integrity and security. As shown above, the DataMax® cable core is protected from external noise and alien crosstalk. Competitors’ discontinuous shield is susceptible to external noise and signal emission — affecting the data speed and security.

Specify success with Quabbin DataMax® stranded patch cable

Select patch cable
» Speak with a Cable Design Specialist
» Speak with your Quabbin Regional Sales Manager
» Consult with our engineering staff
» Use our Cable Finder tool at www.quabbin.com/cable-finder

Purchase bulk patch cable
» Visit our web site to find your local Sales Representative
» Contact us to speak with your QWC Sales Representative

Purchase finished assemblies
» Referral to a qualified assembly house that stocks our products
» Our partners are able to maintain the high data rates of our cables in the finished patch cord assemblies
